PROFILE

I am a junior web developer searching for a challenging and fast-paced work environment. I am not constrained by any one technology and I am eager to apply my skills in an agile position.

PROJECTS

Local Swap -Bartering application that geolocates users upon their address while hiding their exact location. Allows users to message one another, create chatrooms, post items in an e-commerce style architecture, and authenticate into a secure system.
Ego Ipsum - Generates themed Lorem Ipsum filler text using a React on Rails implementation. Users can create themes and styles.
Weird Map - Allows users to view entertaining destinations in the Portland area, filter locations by category, visualize density of locations and create a route with directions of up to eight locations.

EXPERIENCE

WEB DEVELOPMENT INTERN
ALPHA MEDIA | OCTOBER 2016 - NOVEMBER 2016

- Developed an internal digital resources management application in RoR and ReactJS that is currently being used by Alpha Media's digital content team.
- Participated in the SCRUM cycle and deployed production application to Digital Ocean servers.

PROGRAM SPECIALIST
ESRI MANAGED CLOUD SERVICES | JUNE 2015 - APRIL 2016

- Interfaced with customers to gather technical requirements and set clear technical expectations.
- Supported needs of technical team and supported over 40 live accounts. Adhered to a strict 24 hour turnaround of proposal and contract changes.
